

PG – 577

III Semester M.Com. Examination, January 2017
(CBCS)
COMMERCE
Paper – 3.4AT : Strategic Cost Management – I

Time : 3 Hours

Max. Marks : 70

Instruction : Answer all the sub-sections.

SECTION – A

1. Answer **any seven** of the following. **Each** question carries **two** marks. (7×2=14)
- State the key difference between cost accounting and cost management.
 - Define cost drivers.
 - Why do you think product life cycle is bell-shaped ?
 - Differentiate cost control and cost reduction.
 - Define strategy.
 - What do you mean by target costing ?
 - State the phases in product life cycle.
 - What do you mean by opportunity cost ?
 - What do you mean by "Zero based budgeting" ?
 - Define lean cost management.

SECTION – B

- Answer **any four** of the following. **Each** question carries **five** marks. (4×5=20)
- What do you understand by cost drivers ? Identify various cost drivers in textile industry.
 - "The concept of performance budgeting relates to greater management efficiency especially in government organisations" explain.

P.T.O.

4. Define variance analysis. What are the ways of disposing cost variances ?
5. "Money spent on installing a costing system is not an expense but an investment" comment.
6. The worker is paid Rs. 50.00 per hour and the 5 days working week contains 42 hours. The daily allowance for approved absence from his place of work, maintenance of machine, etc., is 12 minutes and his job cards show that his time chargeable during the week to various cost centers is as follows :

Job No. 305 20 hours

Job No. 310 10 hours

Job No. 320 8 hours

Time unaccounted for is caused by a power failure. Show how for the week would be dealt in the cost accounts.

7. Kurolin express is a large manufacturer of recreational equipment. Performance of the camping division is measured as an investment centre because the managers make all the decisions about investments in operating equipment and space. Following is financial information for the provision :

Average operating assets Rs. 20,00,000

Current liabilities Rs. 5,00,000

Operating income Rs. 3,00,000

Camping division's required rate of return is 12%, but outdoor express's weighted average cost of capital is 9% and the tax rate is 30%.

- a) Calculate ROI
- b) Calculate the residual income
- c) Calculate Economic Value Added (EVA).

SECTION – C

Answer **any three** of the following. Each question carries **twelve** marks. (3×12=36)

8. Alpha Limited has decided to analyse the profitability of its five new customers. It buys bottled water at Rs. 90 per case and sells to retail customers at a list price of Rs. 108 per case. The data pertaining to five customers are :

	Customers				
	A	B	C	D	E
Cases sold	4,680	19,688	1,36,800	71,550	8,775
List selling price	Rs. 108	Rs. 108	Rs. 108	Rs. 108	Rs. 108
Actual selling price	Rs. 108	Rs. 106.20	Rs. 99	Rs. 104.40	Rs. 97.20
Number of purchase orders	15	25	30	25	30
Number of customer visits	2	3	6	2	3
Number of deliveries	10	30	60	40	20
Kilometers travelled per delivery	20	6	5	10	30
Number of expedited deliveries	0	0	0	0	1

Its five activities and their cost drivers are :

Activity	Cost Driver Rate
Order taking	Rs. 750 per purchase order
Customer visits	Rs. 600 per customer visit
Deliveries	Rs. 5.75
Product handling	Rs. 3.75 per case sold
Expedited deliveries	Rs. 2,250 per expedited delivery

Required :

- Compute the customer-level operating income of each of five retail customers now being examined (A, B, C, D and E). Comment on the results.
- What insights are gained by reporting both the list selling price and the actual selling price for each customer ?
- What factors Alpha Limited should consider in deciding whether to drop one or more of five customers ?

9. A machine used on a production line must be replaced at least every four years. The costs incurred in running the machine according to its age are :

Particulars	Age of machine (years)				
	0	1	2	3	4
Purchase price	3,000				
Maintenance		800	900	1,000	1,000
Repairs			200	400	800
Net realizable value		1,600	1,200	800	400

Future replacement will be identical machines with the same costs. Revenue is unaffected by the age of the machine. Assume there is no inflation and ignore tax. The cost of capital is 15%. Determine the optimum replacement cycle. Present value factors at 15% for years 1, 2, 3 and 4 are 0.8696, 1.6257, 2.2832 and 2.8550 respectively.

10. Discuss the statement that "fixed overheads are constant within a limited range of output".
11. What do you understand by JIT ? Explain how it eliminates wastage of resources.
12. What do you understand by cost reduction ? "Cost reduction is the key for global competitiveness". Comment.

PG – 526

III Semester M.Com. Examination, December 2015
(CBCS Scheme)
COMMERCE
Paper – 3.4 AT : Strategic Cost Management – I

Time : 3 Hours

Max. Marks : 70

Instruction : Attend all the questions.

SECTION – A

1. Answer **any seven** sub-questions of the following, **each** sub-question carries **two** marks : **(7x2=14)**
- Differentiate cost control and cost reduction.
 - Differentiate between cost management and cost accounting.
 - State the steps in activity based costing.
 - State the benefits of product life cycle.
 - State the objectives of JIT.
 - Define Kaizan costing.
 - What are the benchmarking codes of conduct ?
 - What do you mean by LCC ?
 - What do you mean by cost drivers and cost pools ?
 - What do you mean by lean cost management ?

SECTION – B

Answer **any four** questions of the following, **each** question carries **five** marks : **(4x5=20)**

- Define ABC. How ABC system supports corporate strategy ?
- Briefly explain how JIT eliminates wastage of resources.
- How is Life Cycle Costing model selected and developed ?
- Briefly explain the steps in strategic cost management programme.
- Bringout the main activities and cost drivers identified and implemented by J. Innes and F. Mitchell.

P.T.O.

7. Inorganic Chemical Ltd., is about to replace its old boiler equipment, either by a coal fired system or by an oil-fired system. Finance costs 15% a year, and other estimated costs are as follows :

(Rs. '000)

	Coal	Oil
Initial cost of Boiler	70	100
Annual operating costs	60 p.a	45 p.a

If the company expected the new boiler system to last at least fifteen years, which system should be chosen ? (PV of Annuity of Re. 1 at 15% for 15 years = 5.847)

SECTION – C

Answer **any three** of the following. **Each** question carries **twelve** marks : (3×12=36)

8. The Columbus Company produces only two products : a major computer part and cell phones. The company uses a normal cost system and overhead costs are currently allocated using a plant-wide overhead rate based on direct labor hours. Outside cost consultants have recommended, however, that the company use activity-based costing to charge overhead to products.

The company expects to produce 4,000 computer parts and 2,000 cell phones in 2014. Each computer part requires two direct labor hours to produce and each cell phone requires one-half hour to produce.

The direct material and direct labor costs included in the two products are as follows :

Item	Computer Part	Cell-Phone
Direct Material (per unit)	Rs. 3,000	Rs. 1,700
Direct Labor (per unit)	Rs. 1,600	Rs. 400

Budgeted (Estimated) Total Factory Overhead Data for 2014 :

Activity	Budgeted Overhead Rs.	Estimated Volume Level
Production setups	Rs. 80,00,000	20 setups
Material Handling	Rs. 70,00,000	5,000 lbs.
Packaging and shipping	Rs. 1,20,00,000	6,000 boxes
Total Factory Overhead	Rs. 2,70,00,000	

Based on an analysis of the three overhead activities, it was estimated that the two products would require these activities as follows in 2014 :

Activity	Computer Parts	Cell Phones	Overall Totals
Production setups	5 setups	15 setups	20 setups
Material handling	1,000 lbs.	4,000 lbs.	5,000 lbs.
Packaging and shipping	4,000 boxes	2,000 boxes	6,000 boxes

Required :

- Calculate the cost of each product using a plant-wide rate based on direct labor hours.
- Calculate the activity cost rates for (a) setups, (b) material handling and (c) packaging and shipping.
- Cost out the two products using an activity-based costing system.

9. A machine used on a production line must be replaced at least every four years.

The costs incurred in running the machine according to its age are :

(Rs.)

Particulars	Age of machine (Years)				
	0	1	2	3	4
Purchase price	3,000				
Maintenance		800	900	1,000	1,000
Repairs			200	400	800
Net realizable value		1,600	1,200	800	400

Future replacement will be identical machines with the same costs. Revenue is unaffected by the age of the machine. Assume there is no inflation and ignore tax. The cost of capital is 15%. Determine the optimum replacement cycle.

Present value factors at 15% for years 1, 2, 3, 4 are 0.8696, 0.7561, 0.6575 and 0.5718 respectively. Present value of annuity at 15% for years 1, 2, 3 and 4 are 0.8696, 1.6257, 2.2832 and 2.8550 respectively.

10. What are the objectives of JIT approach ? Is JIT responsible for bringing changes in a firm-Explain.
11. Explain how life cost analysis is prepared, implemented and monitored.
12. What do you mean by Benchmarking ? Describe main types of benchmarking of critical success factor.
